Certification!

ABOUT US

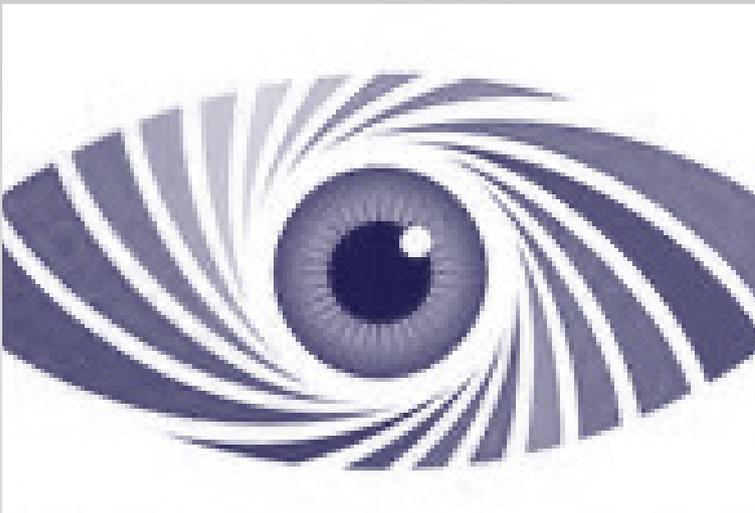

VAJRA
AVIATION PRIVATE LIMITED

Vajra Aviation is committed to shaping the next generation of aviation professionals through rigorous engineering training and internationally benchmarked EASA examination standards.

Founded with a vision to elevate aviation education in India, we offer a structured learning ecosystem that blends technical mastery, real-world industry exposure, and regulatory compliance. Our programs are designed to meet the stringent requirements of EASA Part-66, ensuring that students are fully prepared to excel in global aviation maintenance and engineering roles.

With a team of experienced instructors, modern training facilities, and curriculum aligned with international best practices, Vajra Aviation provides a learning journey that is both comprehensive and career-focused.

OUR VISION

Empowering aviation professionals by delivering knowledge, growth, and excellence

OUR MISSION

To establish a world-class aviation training academy that fosters comprehensive excellence, innovation, and safety in aviation personnel.

AVIATION PRIVATE LIMITED

KEY BENEFITS OF THE TRAINING PROGRAM

TRAINING PROGRAM INCLUDES

Vajra Aviation provides complete ground training for all modules along with in-depth knowledge of aviation maintenance practices. We also offer EASA B1.1 & B2 module examinations, giving students global exposure and international authentication. Students receive job-oriented practical training at certified Maintenance Organizations, gaining real aircraft maintenance experience and hands-on operational practices.

A free second attempt is offered for the EASA exam if the candidate does not pass on the first attempt.

EASA exam sessions are conducted every 3-4 months throughout the year, ensuring flexible and continuous examination opportunities.

EMPOWERING YOU WITH WORLD-CLASS AVIATION EXPERTISE

Develop a career in the aviation industry as a certified maintenance engineer with valuable practical experience. Gain the knowledge and skills required to perform maintenance tasks on a wide range of aircraft. Meet the regulatory requirements set by the European Aviation Safety Agency (EASA) for obtaining a B1 or B2 License. Join a community of aviation professionals and passionate enthusiasts dedicated to excellence in the field.

ADMISSION REQUIREMENTS

- Applicant must be at least 21 years and above
- Qualification : B.E. / B. Tech. (Aeronautical, Aerospace, Mechanical, Electrical & Electronics and Electronics & Telecommunications)
- Proficiency in English
- Valid Passport

COURSE TIMELINE

COURSE
SCHEDULES

JANUARY 26 BATCH

COURSE
COMMENCEMENT
DATE: 28/01/2026

JULY 26 BATCH

COURSE
COMMENCEMENT
DATE: 20/07/2026

Last date for applications will be **15 days** before the course commencement date.
Only **14 seats** are available to ensure focused and high-quality training.

ENROLLMENT PROCESS

- Scan the QR for the application form
- Kindly fill out the required details
- Submit the application
- Our team will Evaluate your Application form
- You will be contacted by our Team

COURSE OVERVIEW

The Graduate Engineering Training Course (GETC) at Vajra Aviation is a comprehensive One year professional program designed to prepare engineering graduates for successful careers in aircraft maintenance and aviation engineering. This course is designed to provide foundational professional knowledge and hands on practical training required to obtain the necessary qualifications for aircraft maintenance.

COURSE STRUCTURE

THEORY TRAINING – 25 WEEKS (700 HOURS)

A solid foundation in aircraft maintenance engineering through a structured and interactive training program.

- Complete fundamentals of aircraft maintenance
- Coverage of all 17 industry-standard modules
- Training on all major categories: Aeroplanes with Jet & Piston Engines, Helicopters Jet & Piston Engines and Aviation Electronics

Regular classroom sessions for focused and guided learning.

PRACTICAL TRAINING – 6 MONTHS

Real-world aviation experience through placement at:

- Certified Maintenance Organizations
- General Aviation Facilities
- Flying Schools

Practical exposure includes:

- Hands-on work on live aircraft systems
- Real-time maintenance tasks
- Technical documentation training
- Safety procedures & regulatory compliance

Placement is based on academic merit.

CERTIFICATION

Candidates who successfully complete all academic and practical requirements will receive a Training Completion Letter from Vajra Aviation. Students must appear for the EASA Exam conducted at Vajra Aviation. Successful candidates are awarded the EASA Certificate of Recognition (COR), which is internationally recognized across the aviation maintenance and engineering sector.

COURSE TRAINING

**Provides you with
knowledge on the
following topics**

**EXPERT-LED
ENHANCED
VIDEOS
CONTENT—CRAFTED
REPRESENT THE CORE OF
AERONAUTICAL KNOWLEDGE .**

**LEARNING
BY
AND
STRUCTURED
TO
OF**

- Understanding the principles of aircraft maintenance.
- Comprehending aircraft materials and hardware.
- Learning the fundamentals of aircraft electrical systems.
- Mechanics of aerodynamics
- Mastering the basics of aircraft engines and power plants.
- Learning about aviation legislation and regulations
- Comprehending the principles of aircraft systems and controls
